

## About Enerpact APX

APX is a cloud based productivity platform designed for operators & suppliers to collaborate on bidding, pricing, ordering, purchasing and payments. The tool is designed to make both Operators & Vendors more productive and profitable

Enables efficiencies to both Operators & Vendors

### Operators

### Vendor/Supplier

#### AP Team Efficiencies

#### Vendor Efficiencies

- No effort setting up invoices needed
- Workflow consistent with upstream business processes
- Complete Visibility of invoices and backup documents
- Automated bulk audit support

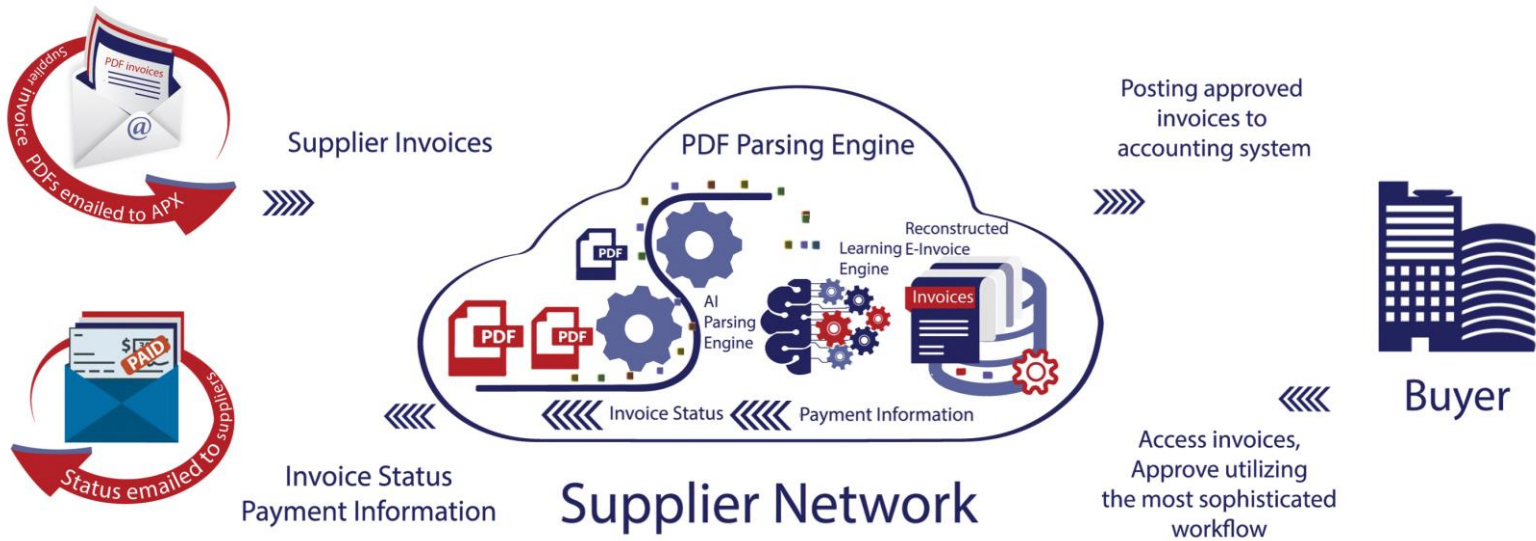

- All supplier modes of submissions supported
- AI Engine parses Invoices, FTs & AFEs
- Manual verification process guarantees accuracy
- Supplier onboarding made redundant

#### Operations Efficiencies

#### Vendor Communications

- Easy setup of multiple layers of workflows based on DOA
- Integrated AFE , Cash Forecast, Accruals, Field Estimates
- Field ticket processing optimizes invoice routing & reconciling spend
- Accessibility to all decision data for approvers

- Supplier portal offloads supplier communications from Operator to APX
- Supplier portal offers latest son invoice and payment status

*“Well I’ve scanned (pun intended) the universe, and I think I like your product best.”*

**CFO, Mid-Sized E&P Company**
